

## Tárgytematika / Course Description

### Logistics Technologies

AJNM\_LSTA004

**Tárgyfelelős neve /**

**Teacher's name:** dr. Földesi Péter

**Félév / Semester:** 2020/21/1

**Beszámolási forma /**

**Assesment:** Folyamatos számonkérés

**Tárgy heti óraszám /**

**Teaching hours(week):** 2/1/0

**Tárgy féléves óraszám /**

**Teaching hours(sem.):** 0/0/0

---

### OKTATÁS CÉLJA / AIM OF THE COURSE

The students will get to know the basic definitions and goals about the main logistics technologies. They will learn about the equipment of the warehouse, such as the palletized and non-palletized material handling, the order picking and the information systems. We will introduce and analyse the main transportation technologies: road, rail, maritime, air and pipelines. In frame of the seminars, the students will get practical experiences via industrial case studies.

---

### TANTÁRGY TARTALMA / DESCRIPTION

#### Lecture topics

Palletized storage and handling systems I.

Palletized storage and handling systems II.

Non-palletized storage and handling systems

Order picking and packing

Warehouse management and information

Identification systems I.

Identification systems II.

Maritime transport

Air transport

Rail transport

Intermodal transport

Road freight transport

Summary and conclusions

Exam

**Seminar topic**

Case studies: Storage and handling systems

Case studies: Storage and handling systems II.

Case studies: Order picking I.

Case studies: Order picking II.

Case studies: Information systems

Case studies: Information systems

Case studies: Maritime transport

Case studies: Air transport

Case studies: Road transport I.

Case studies: Road transport II.

Case studies: Rail transport

Case studies: Intermodal transport

Summary and conclusions
