OKTATÁS CÉLJA / AIM OF THE COURSE

Summary of the course: During the learning of communication techniques, the main goal of the subject is to develop the empathic skills and relationship-building skills of the students as potential advisors.

After a basic introduction to communication, the subject details and evaluates the knowledge transfer methods that can be used in the work of an advisor.

The main chapters of the course:

basic knowledge of communication, extension strategies, analysis of agricultural knowledge and innovation systems (AKIS), individual (individual farm visits, providing advice in the office) and team methods (demonstration, lectures, article writing, mass communication, group work, organization of presentations) in extension, process of extension, interpersonal communication, information technology using in advisory work.

Competencies to be acquired during the training: use new communication techniques, actively participate in teamwork, actively listen to others, to use the communication necessary for cooperation.
