OKTATÁS CÉLJA / AIM OF THE COURSE

During the semester, students will learn the basic concepts and terminology of domestic animal's anatomy and physiology. The aim of the course is to deepen the knowledge of students coming with different levels of scientific knowledge and to provide them with the anatomical/physiological basis for the future subjects of animal husbandry, animal nutrition, animal health, animal hygiene, biotechnology and reproductive biology.

TANTÁRGY TARTALMA / DESCRIPTION

Topics of the semester

Introduction to Anatomy and Physiology: Terminology and General Plan of the Body
Cells, Tissues and Membranes
The Skeletal System
The Muscular System
The Cardiovascular System and the Respiratory System
The Lymphatic System and Immunity
The Digestive System
The Endocrine System
The Reproductive System
Fertilization, Pregnancy, Parturition
Anatomy of the Mammary Gland, Lactation
The Urinary System

SZÁMONKÉRÉSI ÉS ÉRTÉKELÉSI RENDSZERE / ASSESSMENT'S METHOD

During the semester, two written tests are compulsory, each with a minimum of 50%.

If the result of each test is at least 50% and the average of the two tests together exceeds 3.1%, the student does not have to take the exam

If the test results are below 50 %, the student must take an oral exam
