OKTATÁS CÉLJA / AIM OF THE COURSE

The main objective of the course is to provide a general insight into the legal background of the World Trade Organization, focusing not only on the WTO but analysing also its implications within the European Union as well as in Hungary. The course will improve the participants' skills by explaining how this legal matter and the main sources of this field of law are structured. The course relies upon an approach which emphasises a fusion between theoretical and pragmatic experience, consequently, the program will equip participants with the ability to understand the real function of the legal instruments of WTO and will offer a perspective to look behind the text of the WTO law as well.
