OKTATÁS CÉLJA / AIM OF THE COURSE

The aim of the subject is to develop the students' knowledge of public buildings through project based practical tasks. The key element of the semester is the confrontation with the attributes of the surroundings, the 'genius loci' through the design of a smaller scale public building. The task is to provide appropriate connections with the surroundings and designing a coherent spatial building structure.

TANTÁRGY TARTALMA / DESCRIPTION

The design tasks (a main task and a mid-term design exam) and the tutoring lessons, target the practice and development of the students' knowledge of public buildings.

An integrated part of the course is the so-called Creative Week during the 4th week of the semester, when teams of local and visiting students work together on architectural and design issues with the help of visiting lecturers and tutors.

A series of lectures in the field of the main task is integrated in the practical tutoring sessions, followed by open discussions to investigate the theme of the course on a deeper level.

Schedule of the semester:

Task presentation, site visit, development of the design program. Preliminary design and presentation. Concept development and design. Mid-term presentation and evaluation. Mid-term exam. Final design and final presentation.
